## DETAILED ACTION

### *Election/Restrictions*

Applicant's election **without** traverse of Species A (Figures 3A and 3B, claims 12-14 and 23) in the reply filed on March 10, 2006 is acknowledged.

Claims 1-11 and 15-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim.

Currently, claims 12-14 and 23 are active.

### *Specification*

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: LITHOGRAPHY SYSTEM HAVING A WAFER CHUCK COUPLED TO AN EXPANDER.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 12-14 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Oglesbee (U.S. Patent No. 4,744,550).**

Re claim 12, Oglesbee discloses in figs. 1-2 a wafer holder 10 comprising: a wafer chuck 5 configured to receive a wafer 7; and an expander 3 coupled to the wafer chuck 5 to expand the

Art Unit: 2822

wafer chuck 5 and create an inherent initial stress at an interface between the wafer 7 and the wafer chuck 5 [see col. 2, lines 57-64]. Furthermore, the recitation “[a] lithography system configured to reduce wafer slipping” has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory clause. *Kropa v. Robie*, 88USPQ 478 (CCPA 1951).

Re claim 13, Oglesbee expressly discloses in fig. 1 the expander 3 comprises an annular ring coupled to said wafer chuck 5.

Re claim 14, Oglesbee expressly discloses in fig. 1 said annular ring (3) is coupled to an outer edge of said wafer chuck 5.

Re claim 23, Oglesbee discloses in fig. 6 said expander 3 is configured to expand said wafer chuck 5 in an uniform manner [see col. 3, lines 42-48].

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following prior art references disclose relevant teachings regarding wafer chucks Snijders (US ‘404), Kubo (US ‘911), Handotai (JP ‘754A) and Arai (JP ‘630A).
